

From doc: Titers are Affordable!

Educate your Veterinarian!

If your vet calls Kansas State Diagnostic Lab
@ 785-532-4483 they can set up a Diagnostic Account Number.

With this number they can go online to this web address:

<http://www.ksvdl.org>

Following the prompts - 1) admission forms then 2) Core Vaccine Titer- they can submit the client/pet information.

Kansas State Diagnostic Lab will send a UPS free shipping label to your veterinarian.

For only a \$54 charge they will do a package of Titers for Parvovirus, Distemper Virus, Adenovirus, and Rabies Virus. All 4 - \$54

For Rabies titer alone it is \$32

All this pricing depends on your vet doing this online

They draw the blood in a red top serum separator tube and centrifuge for 10 minutes!

If you or your vet have any questions ask for Shirley or Kelsey. These two are customer service friendly!

Finally don't let your veterinarian tell you they use Antech or IDEXX and try to tell you it's \$200 to \$500. These labs are middlemen and the cost will be tripled by the time it gets to you!!

Now is the time for pet owners to check Titers and stop over vaccinating! Your pets life depends on it!

We must Protect the Pets! Doc
